1. Introduction

#CognizantCheers is a global associate recognition program of Cognizant. It provides an opportunity for all associates of the company to be acknowledged and rewarded for demonstrating our core values, achieving company goals and going above and beyond in contributing to Cognizant's success. The #CognizantCheers platform makes the recognition experience simple, engaging and memorable. It empowers everyone to provide timely and genuine recognition, while creating a consistent recognition philosophy and approach for all associates.

The application #cognizant cheers can be directly accessed by the URL: <https://www.globoforce.net/microsites/t/home?client=cognizant>

But Only the Employees of Cognizant have the access to this application.

We are taking and testing the following functionalities of the application:

1. Checking the basic functionalities of Store Page
2. Providing a colleague EmpId in the "Find a Colleague" Textbox and navigating to the colleague profile Page. Retrieving the colleague name from the profile page and validating it.

1.1 Intended Audience

- Business Unit (BU) SME
- Academy coach
- Technical Trainer

1.2 Project Scope

This document defines at a functional level the business activities that are encompassed by the system and the rules that apply to them. It also encompasses some of the key high- and low-level technical requirements of the system.

It draws heavily on both proposed Framework and Business Rules and the Technical Architecture documents. The scope of the detailed analysis project phase specifies that this document will include.

- Classification of requirements according to their functional areas.
- A description of each process in the system, including their inputs, outputs, and data transformation rules.

2. Overall Description

2.1 Operating Environment

- Windows operating system
- Web application
